

# Veenstra Technology

- ✓ Agitators & Mixers
- ✓ Bulk loading systems
- ✓ Machine construction
- ✓ Metal working

# ABOUT US

Veenstra Technology is an all-round machine factory specialised in the design and manufacture of agitators and bulk material technology. Veenstra is also your partner for machine construction, unique machine parts, and maintenance & overhaul.

Every day the people of Veenstra Technology are busy with realizing their high-quality end products. Our people in the office as well as our people in the factory do contribute to this.

## **Veenstra Technology provides a wide range of products and services**

Veenstra is specialized in machine and equipment construction and the design/manufacturing of machines and tools

# AGITATORS

## Robust top quality agitators and mixers

### Veenstra does provide you with an extensive agitator program:

- Top-, side- and bottom entry agitators
- Column mixers
- Portable mixers
- Agitator elements
- Diverse appendages
- Agitator engineering
- Repair and overhaul of agitators

Veenstra Technology's agitators are internationally known for their robust construction and quality. The agitators are widely applicable and they are manufactured according to the highest quality standards from high-quality materials. Veenstra designs your agitator, exactly tailored for your requirements.

# BULK LOADING SYSTEMS

Efficient loading systems  
tailored for your situation

Veenstra Technology advises you in  
your bulk loading needs:

- Loading spouts
- Fluidisation systems
- Airslides
- Positioners
- Mobile loaders
- Dosing valves
- Gate valves
- Segment valves
- Rotary valves
- BIG-BAG loading systems
- Bulk loading systems engineering
- Repair and overhaul of bulk loading systems

Thanks to our years of experience, we have a broad knowledge that can contribute to the optimisation of every loading situation for tankers, open vehicles, trucks, ships, buckets and containers.

# MACHINE CONSTRUCTION

**Together with Veenstra you  
will get great machines**

**For the development and manufacturing of your new machine you  
can rely on Veenstra. We are happy to work with you, from  
prototype to the final product.**

It is also possible to have your current machine modified by Veenstra. In this way your machine will meet your future requirements again. In collaboration with Veenstra, your machines will be in excellent condition!

Whether you want an entire machine or a single part, we will support you. Many years of experience ensure that our professionals will provide you with high-quality products which do comply with international machine- and equipment regulations. CE marking is therefore no problem at all!

# METALWORKING

**Veenstra takes care of all your metalworking issues**

**We can machine all kinds of machinable materials into mechanical parts. These can be fine parts as well as heavy-duty items.**

Our modern CNC lathes and milling machines can produce up to 10,000 products per session, depending on the size and requirements. Veenstra provides you with the following services:

- CNC turning
- CNC milling
- Conventional turning
- Conventional milling
- Keyway slotting
- Boring
- Welding
- Sand blasting & painting

We like to unburden our customers by offering a complete solution. Even when a short lead time is required, we will help you.

# ENGINEERING

## Veenstra; from idea to design to final product

Veenstra Technology's engineering office can be deployed from the first phase of the design process. We are happy to help you convert your idea into an actual, high-quality product. Naturally, we will set clear quality demands for the process, and you can assume the highest safety, reliability, functionality, user and maintenance friendliness of the machines and equipment that we produce.

With many years of experience the in engineering and development of customer-specific parts and machines, the CE marking, machine guidelines and guidelines for work equipment are daily routine for Veenstra. we are happy to advise you about this.
